

Koninklijke Vlaamse Chemische Vereniging (KVCV vzw)

## Your company membership to the Royal Flemish Chemical Society

Dear Sir or Madam,

On behalf of the Board of Directors of the Royal Flemish Chemical Society, I would like to invite you to sign up for a company membership.

The Royal Flemish Chemical Society assembles and represents persons that hold a passion for science, in particular chemistry. Our Society promotes science and chemistry by the organization and support of numerous activities in this field. Amongst our members we have students, teachers, professors, technicians, process engineers, production managers, R&D managers and consultants, active in material and life sciences. The interdisciplinary character of our society forms the basis of our cordial collaboration with *essencia* Vlaanderen and all Flemish universities and colleges.

The objective of the Royal Flemish Chemical Society is to contribute to the popularization of Science and technology by aiming for a broad audience. Examples of our initiatives include the biennial Kekulé-cycle, the Lab managers Network, our participation in "Dag van de Wetenschap" and the organization of numerous symposia. These initiatives are in our opinion essential to maintain and even to increase the level of education and the wealth in Flanders. Talented employees of tomorrow need to be motivated today to choose for a technological career in the private or public sector. The Royal Flemish Chemical Society is convinced that through this interdisciplinary collaboration we can cope with the imminent ageing in the high-tech sector. Next to this all members receive a subscription to *Mens & Molecule*. This journal for the (bio-)chemical sector in Flanders is published by the Royal Flemish Chemical Society and appears in nine issues per year.

The Royal Flemish Chemical Society is not able to organize these promotional activities without financial support. Therefore, we kindly ask you to sign up for a company membership. Attached to this letter, you can find the modalities of the three formulas we have on offer. Please sign up for a company membership through our online registration form.

On behalf of the Board of Directors of the Royal Flemish Chemical Society, I would like to thank you for your confidence in our society and for considering this call for financial support.

Your faithfully,

dr. Christophe De Bie,

Algemeen Voorzitter KVCV ([voorzitter@kvcv.be](mailto:voorzitter@kvcv.be))
