

Cuvelier, Bartholomé

Born: April 10, 1905 – Gors-Opleeuw (Limburg)

Died:

He finishes his secondary studies at the college of Hasselt in 1923, graduates at the University of Leuven in 1928 and obtains his PhD at the University of Gent in 1929.

He is attached to the laboratory of analytical chemistry from 1929 till 1945. From 1945 on he lectures on the hygiene and bacteriology to the future pharmacists, on the analysis and falsifications in the food industry, on the chemistry and physics applied to the hygiene and food analysis to future biochemists.

He publishes books on qualitative chemical analysis (1935, 1945), the importance of milk as drink and the nutritious value of milk and beer
