## LJUBLJANA, SLOVENIA

Ljubljana, the capital of Slovenia, is a vital city which is developing with a clear vision, putting the quality of life at the forefront. Although with 288.000 residents, it does not rank among the major European capitals and large cities, it combines in fact many facilities and services of a metropolis with the relaxed ambiance and safety of smaller towns. Ljubljana has been actively present on the European conference map for more than thirty years. Its positioning has been supported by the strong scientific potential generated by the Ljubljana University, which is sided by a host of research and scientific institutes. In 2016 Ljubljana was awarded the European Green Capital 2016 title. This title is putting Ljubljana on the map as one of the European cities that are aware of the significance of environmental and social sustainability and are taking concrete measures to address issues in this field.
